DETAILED ACTION

1. The amendment filed on 12/13/2007 has been entered. The substitute reissue oath filed on 04/17/2008 has been reviewed.

Rejection under U.S.C. § 251

2. Claims 15-18 are rejected under 35 U.S.C. 251 as being based upon a defective reissue declaration. See 37 CFR 1.175.

The reissue oath/declaration filed with this application is defective because it fails to identify at least one error that is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414.

In his reissue declaration Applicant asserts, "I believe that claims 1-5 of the original patent upon which the present reissue application is based may be at least partially inoperative for claiming more than I was entitled to claim and for failing to claim adequately certain aspects of my invention, particularly the aspects of the semiconductor element and dummy semiconductor element having the same dimension."

However, MPEP § 1414 explains,

[T]he oath/declaration must specifically identify an error. Any error in the claims must be identified by reference to the specific claim(s) and the specific claim language [emphasis added] wherein lies the error. A statement of "...failure to include a claim directed to..." [or as Applicant phrases it, "failing to claim adequately certain aspects of my invention"] and then presenting a newly added claim [or by paraphrasing a newly added claim with language such as "particularly the aspects of the

Art Unit: 2826

semiconductor element and dummy semiconductor element having the same dimension"], would not be considered a sufficient "error" statement since applicant has not pointed out what the other claims lacked that the newly added claim has, or vice versa. Such a statement would be no better than saying in the reissue oath or declaration that "this application is being filed to correct errors in the patent which may be noted from the change made by adding new claim 10." In both cases, the error has not been identified.

See MPEP § 1414 (II)(c).

To produce an acceptable statement of error (when the error is in the claims, as appears to be the case here), it is imperative that Applicant identify an error by specifically pointing out "what the other [i.e. the originally patented claims] claims lacked that the newly added claim has, or vice versa." Again, please consult MPEP § 1414 (II)(c).

Conclusion

3. THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
